

Scott W. Condra  
SVP of Development  
Jacoby Development, Inc.

Scott W. Condra is Senior Vice President of Development at Jacoby Development, Inc. He joined JDI in 2005 following his position as Vice President/Area Manager for MACTEC, a large civil and environmental engineering consulting firm. At JDI, Scott is responsible for all phases of design, construction and implementation for mixed-use developments throughout the United States.

Scott has more than 20 years of experience with project and business management including an extensive background in environmental remediation, civil engineering design, construction management and federal and state permitting requirements.

He has managed the remediation of several former military facilities for transfer to civilian uses, multiple commercial brownfield developments and the detailed characterization of sites for location of a low-level radioactive waste disposal facility. This included managing teams that conducted detailed site characterization studies in natural resources, water resources, cultural resources, geochemistry, air quality, meteorology, seismicity, geomorphology, geotechnical, hydrogeology, and geophysics.

Scott is a graduate in civil engineering from Georgia Institute of Technology and Southern Polytechnic State University. He is a board member of the Marietta Redevelopment Corporation, Cobb Landmarks and Historical Society and Local Reuse Authority, Naval Air Station (Atlanta).
